Hauck Ranch

2025 Private Treaty Offering Yearling Simmental & Sim-Angus Bulls

Hauck Ranch 7407 101 St. SE Forbes, ND 58439

Greetings Cattlemen

Welcome to our 8th annual private treaty bull sale. As I write this, new alltime record prices are being recorded in both the feeder and live cattle contracts. Most producers sold their calves at all time highs this past year. I think most would agree that this uptrend is well received. Hopefully these prices stick around for awhile.

Genetic decisions made today will impact your herd far longer than realized. Even if the bull only breeds for four years, his last daughters will hopefully still be around as 10 year old cows in 2040. Whether you like it or not, your cowherd will start to model your seedstock suppliers'. All of the sale bulls are backed by easy fleshing, big ribbed, feminine made females with a sound and functional udder and legs. We focus a lot of time on our maternal genetics trying to eliminate any problems before it reaches our customers.

Once again, we feel there is a good mix of bulls in the offering. These bulls represent the top 15% of our herd. We are confident in the quality of our genetics and frankly put, we will not sell bulls that we wouldn't be comfortable using on our own cows. Both performance bulls as well as heifer safe options are available. A note to remember is the bulls offered are April calves, thus their weaning weights will be lower. We encourage you to look at the EPD's and adjusted weaning weights as these paint a more accurate picture of our offering. All black bulls are homo-black and homo-polled, unless otherwise listed.

If you have any other questions or would like to view the bulls in person, please don't hesitate to contact us. We look forward to visiting with you!

SIX MILE JOHN WICK 882E SIX MILE MOSSY OAK 175H RED SIX MILE MISS LARK 225E HSA MR. MOSSY OAK M616 WS PRIME TIME B6 BLCR MISS PRM TIME D631 BLCR MISS WILMA W911

This is an extremely well-balanced red bull that comes out of one of my favorite cows who has a very refined udder. It's hard to pick a hole in his numbers and he's well made to boot.

The two TJ Gold brothers in this year's offering both will leave fantastic daughters as that has become this sire's legacy. M731 is a long sided option who is easy on the eyes.

This is a purebred Angus bull who is non-registered. I bought his mother last spring from Burchill Angus and, like all the Rainfall females, she is a tank. This bull is powerfully constructed but recommended for mature cows only.

Welcome To Our 8th Annual Private Treaty Offering!

Vaccination Protocol:

Our cattle are all managed on a complete herd health program recommended by Dr. Jim Bain of Frederick Vet Service. The bulls received 7way at branding, and another 7-way shot, Pulmoguard, and ViraShield in September. At weaning, they also received Pulmoguard and ViraShield, and were poured with Ivermectin and injected with Cydectin.

Developing Cattle:

The calves are raised on grass and their mother's milk only. We do not creep feed our calves as we feel we can better identify the more growth oriented, higher performing lines. The bulls are being fed a TMR of ground corn, silage, prairie hay, alfalfa hay, distillers grain, and protein pellets as well as free choice mineral. They are developed slowly to ensure longevity and structural soundness. We strive to provide continued growth and weight gain after the bulls are turned out for breeding and throughout the fall and winter months.

Delivery:

We will semen test, pour the bulls again, and start delivering the bulls April 1st. Delivery is free within the first 200 miles. Delivery past 200 miles will be dependent on the load. We will work with you to deliver your bulls by the most economical means possible.

Terms and Conditions:

Terms of the sale are cash and all cattle become property of the buyer once the buyer takes possession of the bull. All cattle will be registered with the American Simmental Association and those papers will be transferred after purchase of the animal.

Breeding Philosophy:

Our breeding philosophy may differ from others. You won't find extreme EPD's or 900-plus pound weaning weights. Most cattle have more genetic potential for weaning weights than their environment allows for. Instead, we are focussing on commercially relevant traits to improve your bottom line. Fertility, longevity, structural correctness aren't the hype words you see on sale ads. However, cattle who settle first cycle, stay in the herd for 10-plus years, and don't break down help keep you in the black. The females behind these bulls are hardworking, maternal dams that do just that. This, along with breeding for top 30% in the traits helps to keep our herd balanced.

To our customers, neighbors, and friends: Thank You for all that you do every day and all year!
